

The Institute of Mathematics at TU Berlin invites applications for

2 doctoral/academic staff positions

(75% of full-time employee position with salary grade E13 TV-L)

in Stochastic Analysis and its applications to Data Assimilation within the DFG-funded Collaborative Research Center **SFB 1294 “Data Assimilation – The Seamless Integration of Data and Models”**.

Position 1 within Project A01:

[“Statistics for stochastic partial differential equations \(SPDEs\)”](#)

You can find the detailed job advertisement [here](#).

Position 2 within Project A02:

[„Long-time stability and accuracy of ensemble transform filter algorithms“](#)

You can find the detailed job advertisement [here](#).

Successful candidates will work at the Institute of Mathematics at TU Berlin under the supervision of Prof. Wilhelm Stannat and will be part of the active Berlin-Potsdam stochastic community.

The SFB 1294 provides an excellent research infrastructure including a large interdisciplinary network of researchers and its own graduate school, as well as funding opportunities for conference visits, summer schools, and hosting international experts.

Closing date for applications: January 15, 2026.

Further inquiries may be directed to Wilhelm Stannat, TU Berlin (+ 49 (0)30 314-22451, stannat@math.tu-berlin.de).

Please feel free to spread the information.

Traditio et Innovatio
